

Farmstead Shelterbelt/Windbreak Designs:

Try to keep a minimum of 3 rows.

Outside Shrub Row:

- American Cranberrybush (8-10 ft. spacing)
- Arrowwood Viburnum (5 ft. spacing)
- Redosier Dogwood (5 ft. spacing)
- 15 ft. between shrub row and spruce row

Evergreen Rows:

- Norway Spruce & White Spruce (18-20 ft. spacing)
- 18-20 ft. between spruce rows (stagger plants from other row of spruce)

More rows can be added if space allows. Contact the SWCD for assistance.

Row Lengths:

- Take the rows at least 50 beyond the last building being protected

To reduce overheating in the summer, avoid spruce rows on the south side of the building site.
